NRF INNOVATION RANGE

NRF INNOVATION RANGE

NRF is a global leader in aftermarket solutions for hybrid and electric vehicles, with a strong strategic focus on E-Mobility.

Now, we introduce our Innovation Range, a brand-new catalog featuring EV parts across multiple categories, including:

- > Body and Exterior
- > Steering and Suspension
- > Brakes
- > Filters
- > And many more!

NRF E-Mobility mission

Our mission is to provide a comprehensive product range that goes beyond supporting our partners, it will empower them.

INNOVATION RANGE

Boost your offer with NRF

The number of electric vehicles going out of warranty is increasing, leading to a growing demand for aftermarket parts.

We are expanding our product range to meet this demand, ensuring that we offer the most comprehensive selection of electric vehicle parts on the market.

NRF offers the largest and fastest growing aftermarket cooling range for hybrid (HEV or PHEV) and electric vehicles (EV).

E-Mobility Training Offer

Each year, these NRF trainers conduct over 1,000 technical training sessions across Europe.

Besides the on-site training, NRF also offers online sessions. During specialized EV training courses, mechanics learn the essential knowledge required to work on electric vehicles.
